

rddapp documentation style guide

Irena Papst

Some notes to keep the writing and formatting style consistent within the docs for rddapp, including the shiny help page and the rddapp vignette.

Headers

- Header levels are as follows:
 - 1: Page (e.g. Model, Power)
 - 2: Tabs/panels within pages
 - 3: Anything within tabs/panels
- Header anchors should be all lower case, with spaces replaced with underscores:
 - ## Data tab {#data_tab}

Text formatting

- Any code (package names, functions) should be formatted as an inline code snippet (enclosed in ' marks): rddapp.
- Use **embedded links** where possible (instead of plaintext urls).
